The map is not a guarantee of coverage and contains areas with no service.

* Access the 4G LTE network virtually anywhere within the Coverage Area.

** Access the 4G LTE network in many places within the Verizon Extended Coverage Area. Certain conditions may cause your service to connect to 3G in this Area.

*** Access the 4G LTE network within the Extended Coverage Area; Some of the Coverage Areas include networks run by other carriers, the coverage depicted is based on their information and public sources, and we cannot ensure its accuracy.

These maps are not a guarantee of coverage and contain areas of no service, and are a general prediction of where rates and Mobile Broadband and National Access services apply based on our internal data. Wireless service is subject to network and transmission limitations, including cell site unavailability, particularly near boundaries and in remote areas. Customer equipment, weather, topography and other environmental considerations associated with radio technology also affect service and service may vary significantly within buildings. Some information on service outside the Verizon Wireless proprietary network, although depicted as National Access service, is based on information from other carriers or publicly available information, and we cannot vouch for its accuracy. When digital service is not available, your National Access service is not available and you will not be able to make 911 calls.
